

Declaration of non-use of Persistent Organic Pollutants (POPs) covered by Regulation (EU) 2019/1021

Dear customer,

Persistent Organic Pollutants (POPs) are, e.g., pesticides and some industrial chemicals, which can be transported across international boundaries far from their sources and persist in the environment, bioaccumulate through the food web, and pose a risk to human health and the environment. The continuous release of POPs into the environment has been of serious concern to the European Union since Regulation (EC) No 850/2004 of the European Parliament and the Council on POPs entered into force in 2004. After being amended several times, the POPs regulation was cast into Regulation (EU) 2019/1021 of the European Parliament and of the Council in 2019.

DAFA Group A/S, as a supplier of foam and rubber products and solutions, is aware of the responsibilities of protecting the environment and human health. Based on the verified information, we announce that our products comply with the POPs Regulation and do not contain substances subject to prohibitions listed in Annex I to Regulation (EU) 2019/1021 and amended 2020/784/EU. We continue to follow the POPs regulation update and ensure our products' conformity.

If you have any questions, you are welcome to contact us.
