

# DAFA Universal Tip Protector

Visibility and protection during blade transportation

## Ensure optimal safety by adding visibility to your blades

Avoid costly repairs and delays during the transport, storage, or installation of wind turbines. The DAFA Universal Tip Protector increases visibility and helps prevent personal injuries when people are near the blades.

## Various solutions to fit your needs

Choose from a range of options to find the solution that fits your specific requirements.

Type C30-MS is delivered with an integrated elastic band  
 Type C30 is delivered with one separate lashing strap  
 Type L20 is delivered with two separate straps

## Advantages

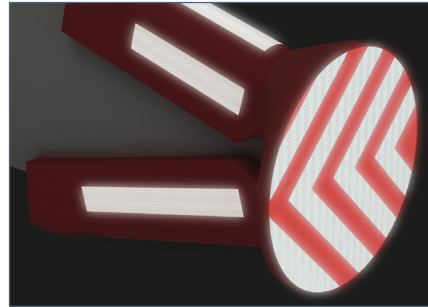

- Protects against injury during storage and installation of the blade
- Optimal visibility and safety during transport, at night and during the day
- Various options that adapt to any type of blade tip
- Exceptionally sturdy, strong and resistant foam
- Easy to mount, no tool costs

## DAFA Universal Tip Protector

### Adapts to all blade types

DAFA Universal Tip Protector is specially designed to adapt to all types of blade tips, whether they are rounded or sharp. Choose from a wide range of standard solutions. Customized solutions available upon request.

### Optimal visibility for greater safety

The strong signal color and reflective strips ensure that the DAFA Universal Tip Protector provides optimal visibility for the blade during both transportation and storage – at night and during the day.

## Various solutions to fit your installation need

Different mounting options, so you can choose the one that fits your specific requirements.

DAFA Tip Protector C30-MS

### DAFA Mounting Spot

Easy, safe, and stable mounting of the Tip Protector both during the storage and transportation of blades. Attach lighting equipment to the solution, such as rotating beacons, for extra visibility during transportation.

- Intended for blade transportation and storage
- Protection against overtightening the components
- Mounted without the use of straps or tape
- Attachment of lighting equipment onto the tip of the blade
- No need for tools during mounting

DAFA Tip Protector C30/L20

### DAFA Tape

Simple and cost-effective method for mounting the DAFA Tip Protector while storing blades. The tape can also be used solely during transportation or in combination with the DAFA Strap Fix.

- Intended for blade transportation and storage
- No need for tools during mounting

### DAFA Strap Fix

Used for attaching lighting equipment, such as rotating beacons, during blade transportation. The solution fixes the strap in place and reduces the load from the strap, so blade edges are protected from overtightening.

- Attachment of lighting equipment onto the tip of the blade
- Brackets on both edges of the blade keep the strap in place
- Intended for blade transportation
- No need for tools during mounting
