

DAFA Universal Tip Protector

Fitting instructions using tape

1

Slide on the tip protector as far as it will go.

4

Wrap the tip protector very tightly by pulling hard using both hands.

The first layer should not extend past the tip protector.

2

Tighten the temporary strap by hand.

5

After winding 5 times around, cut off the roll of tape. Ensure the last layer only touches the blade.

Ensure the tape is tight and the tip protector cannot be pulled off by hand.

3

Place the end of the tape on the top extension.

Make sure the loose strap-end is covered by the tape.

Tip protector item no.: 620027247
Red tape for UTP 100 mm item no.: 620029462

The information in these fitting instructions is intended to assist you in using DAFA products. The user should determine the suitability of DAFA's products for each application.

Making small invisible changes with a big impact...

At DAFA, we seal, we absorb, and we protect.

With a passion for foam and rubber, we are specialized in making small invisible changes with a big impact.

We seal cold air from hot air - and absorb sound to create silence. We dampen vibrations, and we protect objects against shocks and damage. And while our products may seem unnoticeable, they are always irreplaceable.

It all started in 1939 in Denmark.

What began as an entrepreneurial family business producing sealing strips of bronze has today expanded into an international operation - manufacturing the unimaginable across three continents. We cut, we print, and we innovate new solutions. From small nose pads for face masks to protecting large wind turbine blades during transportation, we combine cutting-edge production equipment with great engineering skills and know-how to develop solutions geared to the demands of the future.

But it all begins with our people.

Engineers, operators, or quality controllers. At DAFA, everyone is a master of their craft, united into a culture like a family. Our ambitions are global, but our values are practical and local.

World-class solutions driven by our passion for innovation and sustainability.

Like our products, being visible to the world is not the most important for us. We simply care about being good at what we do and the difference we can make. We go to work every day to earn the trust of each other and our customers - together shaping the future of manufacturing by pushing the industry standards for quality and more sustainability.

We want our 'invisible' products to bring a noticeable impact and make DAFA the best in the world at what we do. Seal, absorb, and protect. One innovative solution at a time.
